

# Reduce Costs, Boost Customer Satisfaction, and Drive Revenue Growth with Hyperscience

## Organizations See Value in Their Data but Are Struggling to Access It

### Breakdown:

#### 80% Non-structured

80% of enterprise data is trapped below the surface. Non-structured formats (e.g. checks, invoices, or bank statements) have inconsistent layouts, making it difficult to extract and act on data.

Unstructured data is growing by 35% year-over-year.

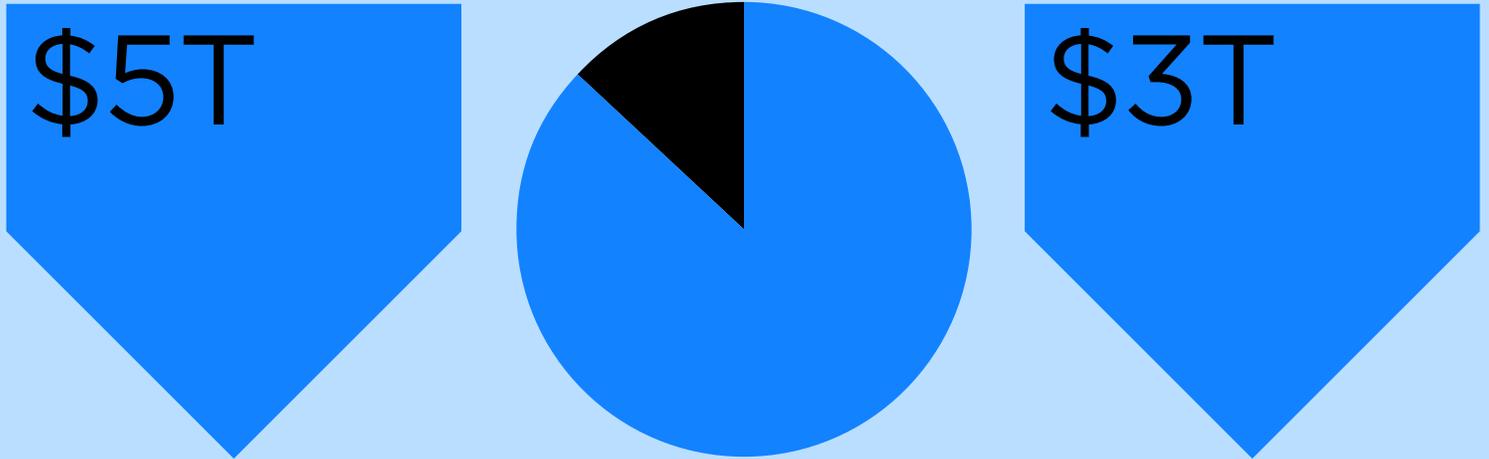

#### 20% Structured

Structured formats (e.g. tax or claim forms) follow a standard layout.

## Limitations of Legacy Solutions

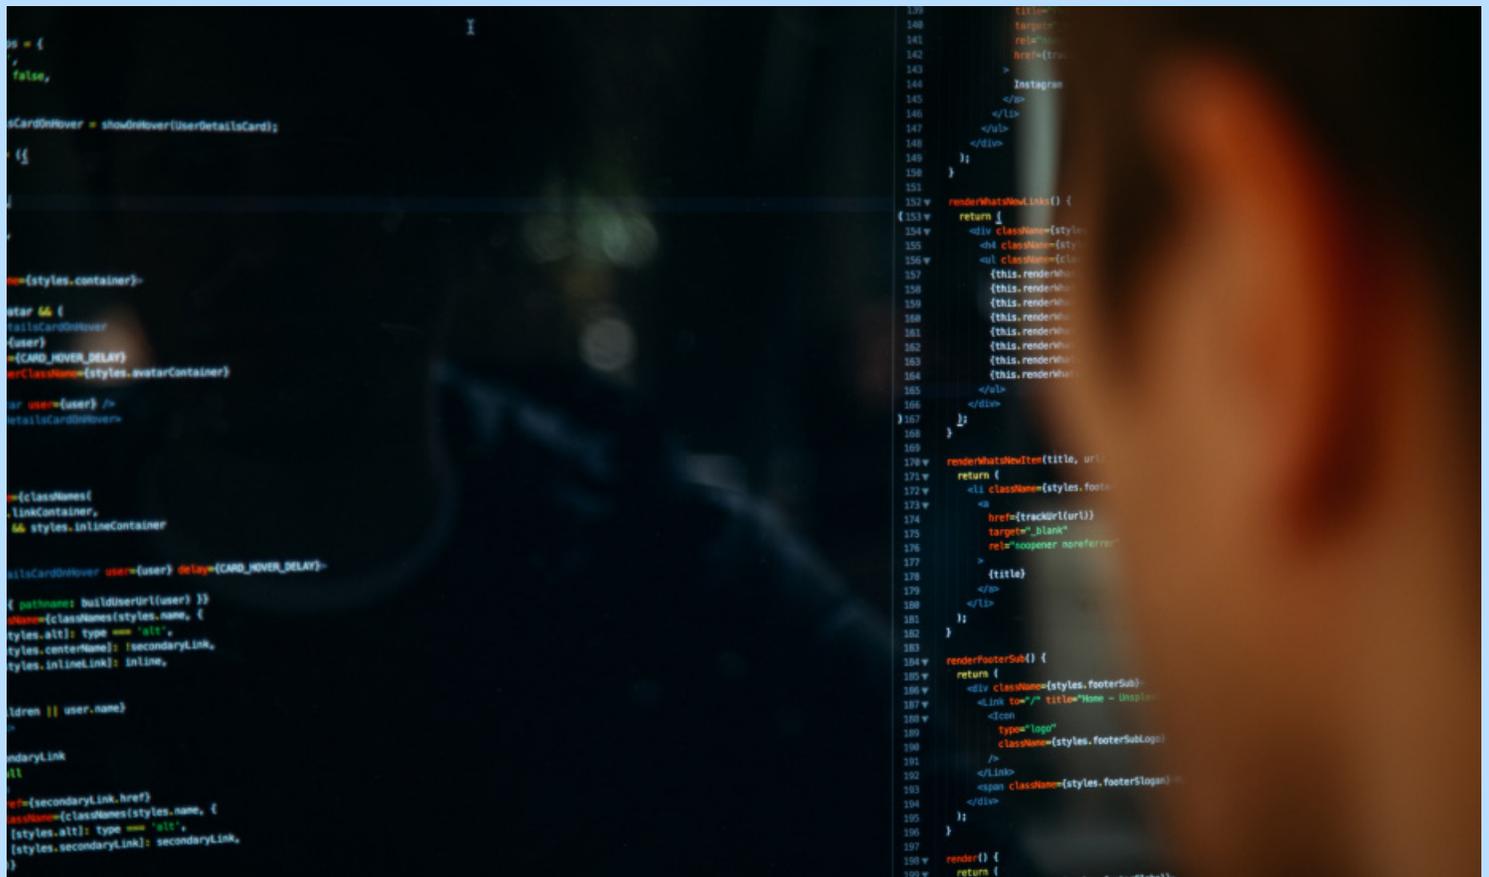

Most automation tools lack the intelligence and flexibility required to automate increasingly complex, document-heavy processes. This results in:

In productivity losses

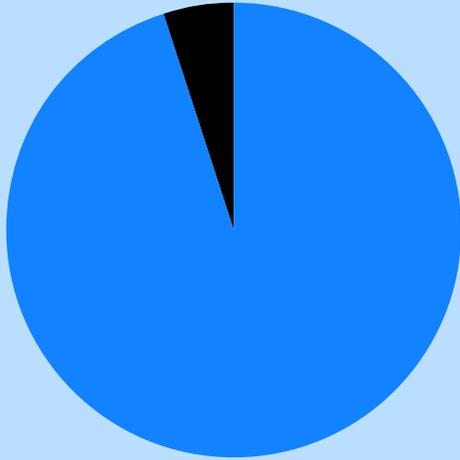

87% of automation initiatives fail to scale

Lost annually due to poor data

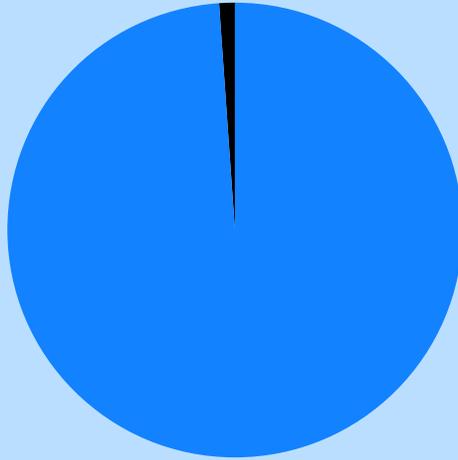

---

## The Solution? Intelligent Document Processing from Hyperscience

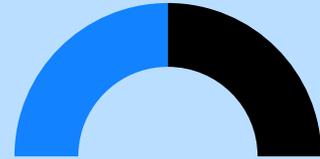

95% automation with additional ML-driven performance improvements over time.

99% accuracy with additional ML-driven performance improvements over time.

10X faster processing to deliver the best customer experience

3-5X ROI from ease of use and flexibility to integrate

**The most flexible intelligent automation platform for document processing and post-extraction management, enabling organizations to improve customer satisfaction, increase revenue growth and reduce costs.**
